

BT200S

Bluetooth Wireless Footswitch Controller

Stompbox style, wireless footswitch, easily integrates with your pedalboard 9v supply, durable road-ready construction!

Quiet steel switches for responsive feel but with little to no sound. Great for pedal board users.

- Customize DAW and MIDI control
- Start and stop backing tracks and metronomes
- Cue audio, lighting, and effects
- Turn pages, scroll lyrics and tabs
- Capture video, photo, and more!

Bluetooth Pedal for Performance

The AirTurn BT200S Series combines the features and performance of the BT200 series with the look and feel of a traditional stompbox style pedal, you can even use a 9v power supply. Built from heavy duty polymer with industrial-grade steel switches. Unlike metal cases, our polymer case doesn't interfere with the radio signal and can still withstand the weight of a truck! With the ability to customize computer keyboard and MIDI commands, it's the perfect app controller for guitarists, bassists, keyboard players, DJ's, recording engineers, and more!

Paperless

No more paper flying away or heavy books to carry. Go green!

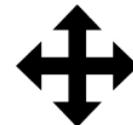

Hands-Free

Keep your hands on your task.

Wireless

No more cables to clutter your setup.

Versatile

Hundreds of compatible apps.

Hands-Free DAW Controller

The perfect pedal for Digital Audio Workstation control. Using our free customization app, AirTurn Manager, assign your favorite hotkeys and keyboard shortcuts to a BT200S Series pedal for hands-free recording and editing control. Arm tracks, start/stop recording and playback, toggle metronome, undo actions, solo/mute tracks, and anything else your computer keyboard can do!

Wireless DMX Lighting and MIDI Controller

The BT200S Series is ideal for controlling DMX lighting fixtures via MIDI commands. With the ability to customize MIDI commands using the AirTurn Manager App, the BT200S Series can effortlessly control many lighting programs, allowing artists to take control over their light show. Most lighting programs can assign a MIDI note or CC to a lighting parameter, this allows users to customize their pedal for their specific lighting needs.

Key Features

- **Sturdy:** Unlike metal cases, our polymer case doesn't interfere with the radio signal and can still withstand the weight of a truck!
- **Max Range:** At 150+ feet, we lead the industry with maximum operating range.
- **Endless Apps:** Hundreds of compatible apps for reading music/lyrics/tabs, triggering backing tracks/effects, MIDI, video/lighting and more!
- **Customize:** 7 default modes cover most apps or assign custom keyboard commands and shortcuts as well as MIDI commands using the AirTurn Manager.
- **Max Battery Life:** A rechargeable battery provides 150-200 hours of play time with a single charge, you can even use a 9v power supply.

Customization

- Choose from 7 default modes that cover most apps or assign custom keystrokes and shortcuts as well as MIDI commands using the free AirTurn Manager app.
- Adjust a full range of settings including: Keyboard strokes including modifiers, MIDI Commands and Notes, Auto-Repeat, Idle Time, Low Power or Fast Response Mode, Debounce, and Switch Types. Switches may be defined as Momentary, Latching, Pulse or Command.
- Two pairing methods. Open pairing lets you store the connections of up to 8 different devices for instant connections. Closed pairing stores the connection for only one device and does not connect erroneously to other devices.
- Use multiple pedals: Configure up to 8 devices at the same time for max customization.

Product weights: BT200S-2: 6 oz (.17 kg), BT200S-4: 11 oz (.31 kg), BT200S-6: 1 lbs (.45 kg)

Product Dimensions: BT200S-2: 4.5x2.75x2 in (115x70x48mm), BT200S-4: 9.75x2.75x1.75 in (248x70x45mm), BT200S-6: 15.25x2.75x2 in (387x70x50mm)

**The AirTurn BT200S will not work with iPads 1 and 2 (Model numbers A1219, A1337 and A1395 - A1397). If the manufacturer of the tablet says it works with a Bluetooth 4.0 keyboard, it will work with the BT200S.*
