

TAP

Bluetooth Wireless Controller for Percussionists

Wireless trigger to improve your performance! Piezo-operated padded switches deliver a fast and reliable response. Excellent for drummers and percussionists.

- Read music and scroll lyrics
- Trigger backing tracks and effects
- Customize DAW and MIDI control
- Capture video, photo, and more!

Wireless Page Turning Trigger for Drummers and Percussionists

Turning pages has never been easier for drummers! The AirTurn TAP seamlessly blends into your kit or percussion setup with two trigger pads for smooth page turning with the strike of a stick! Depending on what app or software you choose, you can do more than turning pages. You can scroll lyrics and tabs, start and stop back tracks, start and stop a metronome and much more. The TAP is the professional choice for taking control of your tablet or computer.

Paperless

No more paper flying away or heavy books to carry. Go green!

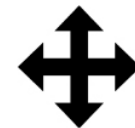

Hands-Free

Keep your hands on your task.

Wireless

No more cables to clutter your setup.

Versatile

Hundreds of compatible apps.

Trigger Your DAW for Recording or Backing Tracks

The perfect trigger for Digital Audio Workstation control. Using our free customization app, AirTurn Manager, assign your favorite hotkeys and keyboard shortcuts to a trigger pad for easy recording and editing control. Arm tracks, start/stop recording and playback, toggle metronome, undo actions, solo/mute tracks, and anything else your computer keyboard can do! The TAP is completely customizable for keystrokes, shortcuts, switching types, MIDI, and so much more!

Customizable MIDI Trigger

Trigger clips and samples, start/stop loops, change presets, toggle effects, the MIDI world is your oyster! Assign any MIDI CC, Program Change, or Note to each switch with any value. Adjust a full range of settings: MIDI Commands and Notes, Auto-Repeat, Idle Time, Low Power or Fast Response Mode, Debounce, and Switch Types. Switches may be defined as Momentary, Latching, Pulse or Command.

Key Features

- **Max Range:** At 150+ feet, AirTurn leads the industry with maximum operating range.
- **Portable:** Lightweight and durable construction allows you to throw it your gear bag and go.
- **Max Battery Life:** A rechargeable battery provides 150-200 hours of play time with a single charge. The TAP works with devices that have Bluetooth 4 or higher.
- **Efficient:** Piezo-operated padded switches deliver a fast and reliable response.
- **Status Indicators:** Bluetooth status LED. Low battery status LED.
- **Power Saving:** Automatically turns off when the host tablet or computer is turned off.
- **Versatile:** Mounts to 1" diameter poles using a side mount clamp.

Customization

- May be used with external momentary triggers, such as the Roland BT-1.
- Choose from 7 default modes that cover most apps or assign custom keystrokes and shortcuts as well as MIDI commands using the free AirTurn Manager app.
- Adjust a full range of settings including: Keyboard keystrokes including modifiers, MIDI Commands and Notes, Auto-Repeat, Idle Time, Low Power or Fast Response Mode, Debounce, and Switch Types. Switches may be defined as Momentary, Latching, Pulse or Command.
- Two pairing methods: Open pairing lets you store the connections of up to 8 different devices for instant connections. Closed pairing stores the connection for only one device and does not connect erroneously to other devices.
- Use multiple devices: Configure up to 8 devices at the same time for max customization.

Product Weight: 1.6 lbs (.72 kg), Product Dimensions: 7x4.5x2.5 in (178x114x63mm)

Please note: High noise or vibration environments can cause unexpected triggers with the TAP. We recommend using the BT-1 with the TAP for extreme high noise and vibration environments.

**The AirTurn TAP will not work with iPads 1 and 2 (Model numbers A1219, A1337 and A1395 - A1397). If the manufacturer of the tablet says it works with a Bluetooth 4.0 keyboard, it will work with the TAP.*
